Energy Star®

The Energy Star® mark is awarded to the most energy efficient heat pumps available in New Zealand, which means better performance all winter long. Our Designer Series models (EF25/35) have been awarded the Energy Star® mark, signalling they meet strict energy efficiency standards.

Quiet Operation

Designer Series indoor units feature Silent Mode - a fan speed setting that provides quiet operation as low as 21dBA. This means that you will feel the warmth, not hear it.

Advanced Filtration

Designer Series Heat Pumps offer two types of filters. The Nano Platinum Filter not only improves air quality but also reduces airborne bacteria. The optional Electrostatic Anti-Allergy Enzyme Filter effectively combats common allergens.

Red Dot Design Award

The Designer Series, with its contemporary slimline profile, has been awarded the prestigious Red Dot Design Award 2015 in recognition for outstanding design quality. The international jury only confers this sought-after seal of quality to products that set themselves apart significantly from comparable products thanks to their excellent design.
